

Valley Grinding

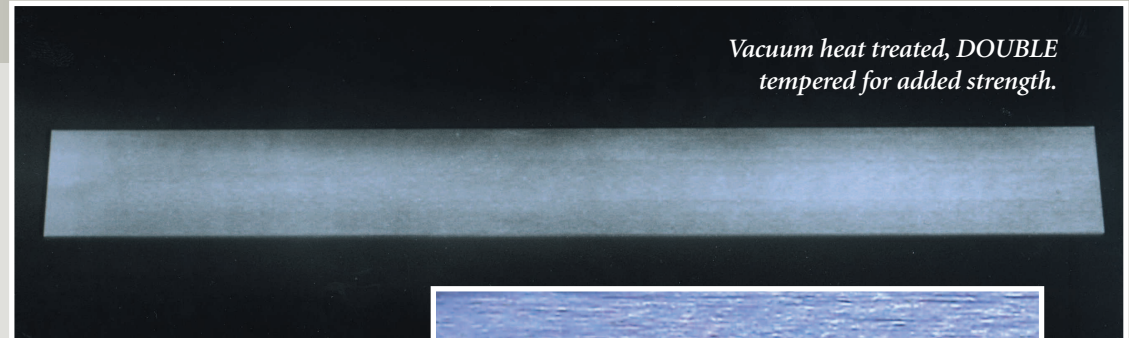

Packaging & Perforation Knives

Full Radius on Perforation Knives Tooth Base Provides Maximum Application Strength

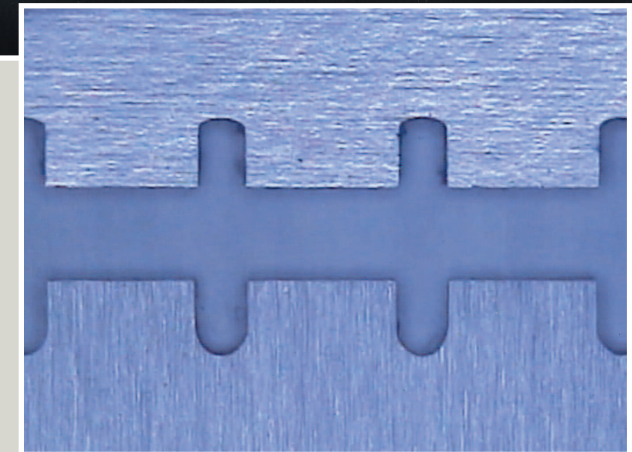

At Valley Grinding, we work with our customers to help them select Packaging and Perforation Knives with the blade configuration and bond pattern best suited to match existing machine specifications.

- With Valley Grinding Perforation Knives, the height, pitch, pattern, and tooth shape are designed for maximum product performance at the best price. The base of the tooth is a FULL radius to ensure maximum application strength ... resulting in decreased downtime from hidden stress cracks and tooth fracture.
- All Valley Grinding Perforation blades are ground “with the cut” to ensure maximum strength and less opportunity for stress fracture. Vacuum heat treat and DOUBLE temper processes provide consistent hardness, maximum austenite to martensite transformation, and equal carbide formation.
- Valley Grinding Packaging and Perforation Knives are manufactured from American Iron & Steel Institute certified steel to guarantee quality while providing superior wear resistance, dependable performance and long production life.
- Many standard blanks are in stock. Simply call Valley Grinding with the bond and cut geometry for your application and we will provide a quick turn-around ... less than one week in many cases.
- Valley Grinding Packaging and Perforation Knives are designed for use in a variety of industries including: Packaging Equipment Operations; Business Form Manufacturers; Tissue Products; Paper, Film and Foil; Paper Towels and Non-Wovens including Disposable Diapers and Sanitary Products; Clean Room Applications and the Food Industry.

For the finest product quality, industry expertise and “cutting edge” technology, you can rely on the experts at Valley Grinding.

Vacuum heat treated, DOUBLE tempered for added strength.

Close-up shows Valley Grinding extra strength full radius tooth base vs. standard square base.
