

Valley Grinding

Paper Trimmers, Three Knife Trimmers

Quality Materials and Craftsmanship Insure Long Cutting Life

Valley Grinding offers four grades of Paper Trimmers and Three-Knife Trimmers for greater cutting efficiencies, durability and toughness.

- SST trimmers are made of a solid, through hardened High Carbon-High Chrome tool steel that is rich in wear resistant alloying elements, making it an excellent choice for normal cutting.
- HSS High Speed Steel trimmers provide 3 to 5 times the life between sharpening compared to regular steel knives. HSS steel offers the finest grain available, resulting in the sharpest edges that resist nicking.
- Cera-Steel™ Proprietary Super Alloy Trimmers offer greater durability and toughness and are perfectly pared for cutting acid-free and recycled papers.
- TCB-Ultra Fine Grained Tungsten Carbide offer the ultimate life and abrasion resistance in trimmers. All carbide knives are not created the same. TCB Tungsten Carbide has a grain size significantly smaller than One Micron and is guaranteed to last as long or longer than other carbide knives. Wear life improvements of 25 times steel knives and 2 times standard carbide are not uncommon.
- Inlaying and heat treating steel in an ISO quality certified location assure product quality and consistency.
- Knives provided with protective guard to insure operator safety.

For the finest product quality, industry expertise and "cutting edge" technology, you can rely on the experts at Valley Grinding.
